Managed Wind-Down Update

On 30 September 2024 shareholders approved resolutions in relation to the discontinuation of Aquila European Renewables Plc (the Company) and amendment of the Company's Investment Policy to enter a Managed Wind-Down.

On 24 October 2024 the Company announced that the Board has appointed Rothschild & Co as the financial advisor in relation to the Managed Wind-Down process.

Necessary preparations for offering the portfolio to market have progressed well with formal marketing materials expected to be distributed shortly. The objective is to complete the sale process as quickly as possible, without prejudicing value. The Board will communicate in due course how it proposes to distribute the capital sale proceeds which are received.

Dividends

- Dividend approved for Q4 2024 of 0.79 cents per Ordinary Share.
- Following the shareholder vote to approve a Managed Wind-Down of the Company, it is the Board's intention to continue paying dividends covered by earnings and taking into account the Company's liquidity position, in order to maintain the Company's investment trust status.
- As such, the Board will no longer provide dividend guidance as to the level of dividend for the year ahead.

Financial and Operational Highlights⁶

- The Company's Net Asset Value (NAV) as at 31 December 2024 was EUR 320.2 million or 84.7 cents per Ordinary Share (30 September 2024: EUR 341.5 million or 90.3 cents per Ordinary Share). Over Q4 2024, this represents a NAV total return of -4.6% (-5.6 cents per Ordinary Share plus a dividend of 1.4475 cents per Ordinary Share).
- Key drivers of the NAV movement in Q4 2024 were:
 - European power price curves have decreased, most notably in the Nordics, driven by lower expectations for industrial demand, delays and reductions in hydrogen production, postponed battery developments and a resurgence of nuclear power (lifetime extensions and new builds). In Iberia, a declining trend is also observed, with an even sharper decrease in Spain. This is attributed to an increased buildout of PV plants (+7.8 GW by 2030), delays in the development of pump storage, and the interconnector to central Europe (-4.1 cents per Ordinary Share)
 - An increase in risk free rate across the portfolio, resulting in an increase to the portfolio discount rate by approximately 10 bps to 7.3% (-1.0 cents per Ordinary Share)
 - Following the growth of renewable energy in Finland, investments in grid infrastructure have been the utmost priority and as a result balancing and Fingrid costs have increased substantially (-0.4 cents per Ordinary Share)
- Power price forecasts over the next 5 years (2025-2029) were revised down in the Nordics by 5% and by 5.3% in Iberia, relative to the third quarter of 2024.
- Total portfolio production was 5.3%⁶ below budget, which is attributable to low solar irradiation at the Iberian solar PV assets as well as the technical availability of the Norwegian wind park (The Rock). The Finnish wind asset Olhava performed 9.5% above budget and the Greek wind asset Desfina outperformed by 11.3% due to good wind conditions.
- Total weighted average technical availability for the quarter was at 88.9% (Q3 2024: 97.4%), primarily due to The Rock where availability was impacted by icing on the blades, despite an Anti-Icing System being in place. The project company is expected to be compensated with liquidated damages and is working with the turbine supplier to investigate the issue further.
- The Finnish wind asset Olhava (7.1% of NAV in Q4) continues to be in lock-up as a result of debt covenant breaches due to the combined impact of lower production, lower realized power prices and high debt repayment obligations, which are set to reduce from 2025 onwards. The Investment Adviser is currently in discussions with the lender and as stated previously, the Company does not expect any material consequences as a result of the breach.
- The Helgeland District Court announced its decision on the Sami appraisal case on 20 December 2024, ruling in favour of The Rock project company and confirming the validity of the license. AER's share of the NOK 4.3m compensation awarded to reindeer herding stakeholders is NOK 590k (EUR 50k). Both the Jillen-Njaarke Reindeer Herding District and Berit Haetta have appealed the judgment from the Helgeland District Court in the appraisal case⁷.
- As of 31 December 2024, the Company had total debt of EUR 152.1 million (including the revolving credit facility, which is undrawn⁸), equivalent to a gearing ratio of 32.2%.

Investment Advisor

Aquila Capital Investmentgesellschaft mbH (ACI) is the investment advisor and asset manager for the Company and is authorised and regulated by BaFin.

Portfolio Map

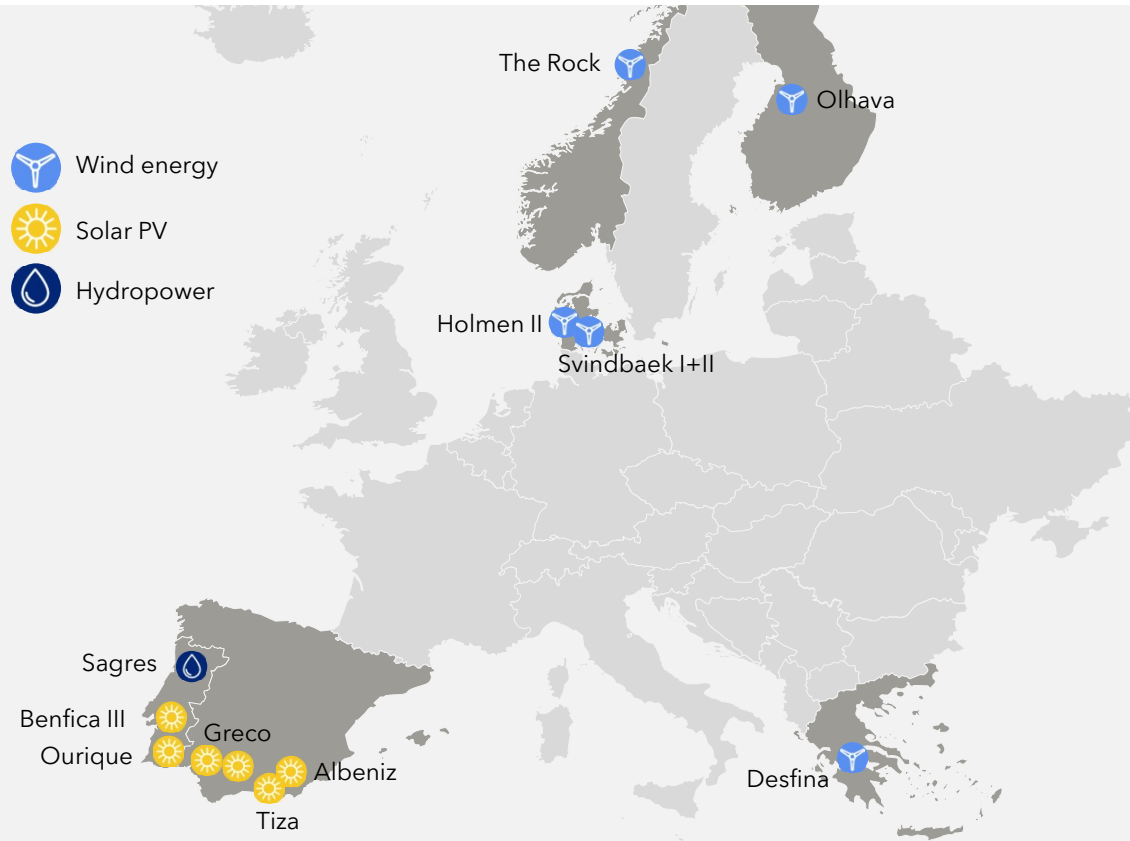

Notes

1. All calculations which use Ordinary Shares exclude shares held in treasury.
2. Calculation includes dividends paid during the period.
3. Total shareholder return is based on an opening share price of EUR 1.00 and NAV total return is based on an opening NAV after launch expenses of EUR 0.98 per Ordinary Share, as at the Initial Public Offering (IPO) date of 5 June 2019.
4. Cumulative with respect to Q4 2024 in EUR cents per share.
5. Dividend yield is calculated by dividing the last 12 months dividend per share by the current market share price as at 31 December 2024.
6. Financial and Operational Highlights data as well as technical availability are subject to further change.
7. The appeals challenge both the court's legal reasoning and the assessment of evidence. Their principal claim remains unchanged: no appraisal due to the invalidity of the license and the expropriation decision. If they don't succeed in their principal claim, they seek compensation.
8. Existing bank guarantees of EUR 2.8 million remain outstanding under the RCF.

Disclaimer

This document is a factsheet of the Aquila European Renewables Plc (the Company) and has been prepared for informational purposes only to give an overview of the Company and its past performance. It constitutes neither investment advice, an investment service nor the solicitation to make offers or any declaration of intent with a view to purchase or sell any shares or other securities in the Company. Any investment decision regarding the Company should be made on the basis of the prospectus, a complete review of all sales documents and in consideration of the risk instructions only; further, the consultation of independent legal, tax and financial, or other professional advisors is recommended.
